Team	Analogy	Who decides the next speaker?
RoundRobinGroupChat	Students take turns reading in a fixed order	**Fixed order** (A → B → C → A...)
SelectorGroupChat	A moderator/teacher points at who speaks next	**An LLM** picks after every message
Swarm	A call center that transfers your call	**The current agent** hands off to the next
MagenticOneGroupChat	A project manager with a task list	**The Orchestrator** plans, tracks progress, and reassigns

Team Type	Real-Life Analogy	Real-World AI Use Case	Agents in the Team	Flow
RoundRobinGroupChat	**Thesis review with a supervisor:** the student submits a draft, the supervisor gives feedback, the student revises, and the supervisor reviews again, in a fixed order	**Blog/content creation for a business:** a social media post gets written, reviewed, and improved	Writer, Editor, SEO Checker	Writer → Editor → SEO Checker → Writer... until "APPROVE"

SelectorGroupChat	**A hospital OPD receptionist:** looks at the patient's problem and decides whether they need the General Physician, Lab, or Pharmacy	**Software house project query:** a client message comes in and the system decides who should handle it	Project Manager, Developer, Designer, QA Tester	The LLM reads each message and picks the right next agent (no fixed order)

Swarm	**A bank helpline (UBL/HBL):** "Press 1 for card issues." The general agent transfers you to the Card Department, which transfers you to the Fraud Team if needed. Each person decides the next transfer	**E-commerce customer support (like Daraz):** order tracking, refunds, and complaints	Support Agent, Order Tracker, Refund Agent, Human (user)	Each agent hands off directly: Support → Refund → back to Support → user

MagenticOneGroupChat	**A wedding planner:** makes a full plan (venue, catering, decor), assigns vendors, checks progress, and replans if a vendor cancels	**Market research report:** "Research AI training institutes in Lahore, compare fees, and make a report"	Orchestrator (built-in), Web Surfer, File Reader, Coder, Analyst	The Orchestrator plans, assigns, tracks progress, and replans if stuck

Quick comparison

Feature	RoundRobin	Selector	Swarm	MagenticOne
Who decides the next speaker	Fixed order	An LLM moderator	The current agent	The Orchestrator
Cost (LLM calls)	💰 Low	💰💰 Medium	💰 Low–Medium	💰💰💰 High
Flexibility	Low	High	Medium–High	Very High
Setup difficulty	Easy	Easy	Medium (handoffs)	Hard
Human-in-the-loop	Possible	Possible	✅ Best (handoff to user)	Possible
Best for	Review loops	Dynamic teams	Chatbots and routing	Complex research tasks
